

ZERO CABIN WASTE

LIFE15 ENV/ES/000209

Example of sustainable management for catering waste generated on board during flights

CO-FINANCED PROJECT BY THE EUROPEAN UNION THROUGH THE LIFE PROGRAM

Duration: September 2016 – December 2019

Aims

- Recycle 4,500 tons of waste per annum
- Reduce 4,340 tons of CO2 emissions per annum
- Reduction of 5% of waste
- Replication of this in other European airports

1. The passenger enjoys his/her catering onboard

2. The staff collect and categorize the waste

3. The catering company dispose of each type of waste appropriately

5. Here it is separated, classified, and recycled for the production of new products

4. The waste is moved to its corresponding waste site
